

# Inside Wireman Apprenticeship

Learning Management System (LMS)

## *On-Line Homework*

**The Inside Apprenticeship** utilizes Blended Learning to meet the needs of today's electrical industry. Blended Learning mixes face-to-face active classroom activities (knowledge) and hands-on labs (skills) at the training center with immersive online homework. This combination allows you to gain valuable theory along with real-world lab environments throughout your apprenticeship.

During your class time, your instructor will introduce topics of your training and you will be expected to fully study outside of class time—utilizing actual textbooks and the online LMS. Prior to your next class, your instructor will review Instructor LMS reports to examine your homework progress and prepare a lesson plan for the entire class. This lesson plan may include covering a portion of your homework and quizzes, and implementing in-class active learning activities.

**On-line homework** consists of reading resources, simulators, animations, media clips, self-knowledge checks, and a lesson quiz that allows the instructor to assess your learning progress. The homework can be accessed from a computer/tablet that is running a full version of Windows 7/8 and has access to the internet. The computer/tablet will access the LMS via a browser (e.g. Internet Explorer, Firefox, Chrome, etc.). Initially you will have to load a few browser plugins (such as FLASH) and set a few browser configurations (such as allowing pop-up windows).

**How do you get started with the on-line LMS?** Your training center will either:

- (1) Register you on the LMS with your provided email address and desired (or temporary) password
- (2) Direct you to submit a request to LMS, thereafter the LMS Administrator will accept your request and make your credentials active in the LMS.

Both of these methods are accessed from: <http://blendedlearning.njafc.org>.

The screenshot shows the NJATC Blended Learning LMS interface. On the left, there is a circular logo for NJATC (National Joint Apprenticeship and Training Committee) with the text 'NEW - NECA' and 'ATTITUDE - SKILL - KNOWLEDGE' around it. To the right of the logo, the text 'NJATC BLENDED LEARNING' is displayed in large, bold, blue letters. Below the logo and title, there are two main sections: 'SIGN IN' and 'NOT YET REGISTERED?'. The 'SIGN IN' section contains two input fields for 'User Name' and 'Password', followed by a blue 'SIGN IN' button. Below the input fields is a link for 'Forgotten your username or password?'. The 'NOT YET REGISTERED?' section contains a paragraph of text: 'Are you ready to start training? Click the link below to request access through the local training center.' followed by a blue 'REGISTER' button. At the bottom of the page, there is a link for 'LMS Support' and a copyright notice: '© 2011, National Joint Apprenticeship and Training Committee'.

**How to log into the LMS:** Once your LMS Login credentials are active, you can access the system by going to either [www.electricaltrainingalliance.org](http://www.electricaltrainingalliance.org) and selecting <Learning Center>; <Blended Learning>, and launch. Or, go directly to the login page by accessing the URL <http://blendedlearning.njatc.org>.

On the initial login you be required to read the “LMS Terms of Service (TOS)” and agree. This will only occur on the initial login, unless the TOS is revised in the future.

**LMS Terms of Service**  
Blended Learning (hereinafter "the Service") is owned and operated by the National Joint Apprenticeship providing full-length NJATC training courses for IBEW members and NECA personnel with various forms of IBEW & NECA members/employees not indentured in apprenticeship training.  
You are required to agree to the following terms and conditions for use of the Service, including any sub (collectively, the "Terms of Service").  
**USER REGISTRATION, PASSWORD AND SECURITY**  
You have received a user name and password that allow you to gain access to the Service. You are responsible for keeping your user name and password confidential and secure. You are responsible for the security of your account and you are responsible for any unauthorized use of your password or account without the written consent of NJATC.  
**PROHIBITED USES**  
In connection with your use of the Service, you agree not to (a) upload, post, or otherwise transmit any content you are not authorized to access; (c) disrupt or interfere with the security of, or otherwise cause damage to, the Service; or (d) use any data mining, robots, or similar data gathering and extraction tools.

At this point you are at the home page of the LMS. Start navigating the LMS by making selections in the left-hand menu.

- **Home** always brings you back to the opening of the LMS.
- **My Courses** is where you will spend most of your on-line activities.
- **Course Catalog** is a list of additional courses not included in your apprenticeship. If you want to take any of these in addition to your apprenticeship courses, contact your Training Center Administrator.
- **Reports** allow you to review your progress in all of your courses.

When selecting the “My Courses” button, a list of courses you have been enrolled in will appear. There are two tabs...Current Courses and Previous Courses. The current courses tab are courses that were implemented within the past year...the previous courses tab are courses older than a year. Keep in mind; you will be able to see all your enrolled courses throughout your apprenticeship. For example, when you are in 3<sup>rd</sup> Year, you will be able to look at your 1<sup>st</sup> Year courses for reviewing.

To access a course (under the My Courses screen) simply click on either the book cover or hit the “Go” button. This action will take you to the opening page of the lesson. Your instructor will provide you with a schedule of what topics and lessons to do each week. You will also find a course named “Core Curriculum 1<sup>st</sup> Year Syllabus, Based on the 2014 NEC”. This is a handy listing of all your 1<sup>st</sup> Year Core Courses with hyperlinks to each of the lessons.

Once you access a course, a list of the lessons will appear—select the “Open” button to go to any lesson. All lessons are formatted the same. There are bar titles that indicate the homework session:

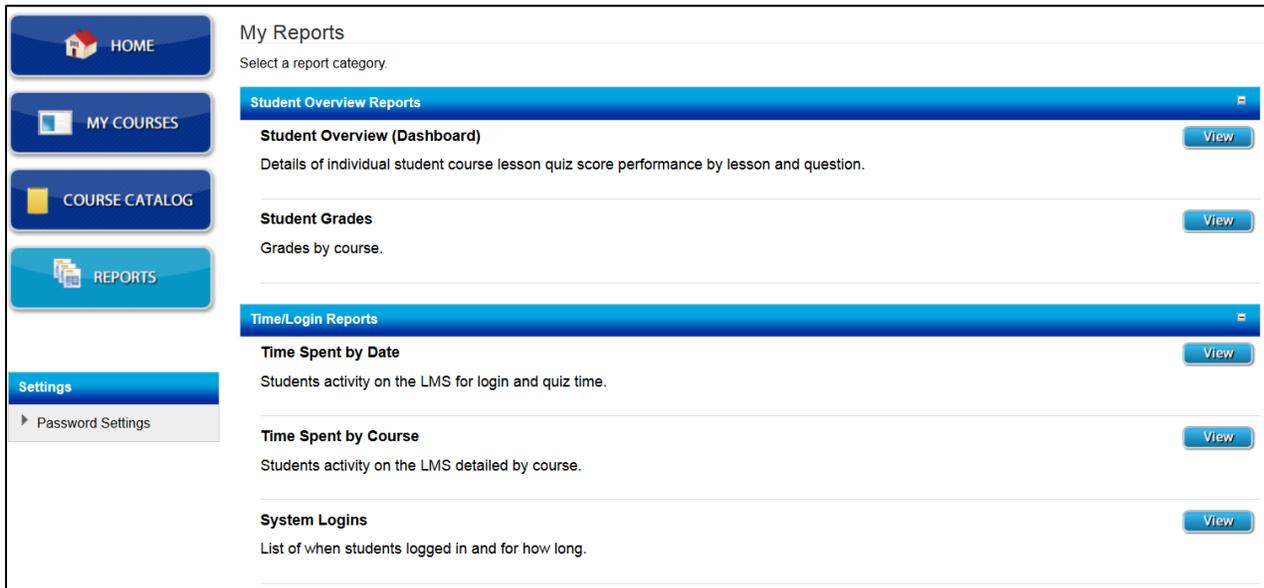

- **Reference** – Textbook chapters to read and online information sheets
- **Introductory Information** – A paragraph explaining the outline of the lesson. Often this includes a video to view.
- **Learning Objectives** – All homework is designed around the performance learning objectives.
- **CourseWare Study Plan & Enhanced Materials** – This section includes all the interactive content, simulators, media clips, etc.
- **Lesson Activity** – This section is the final assessment (quiz) that your instructor will utilize to evaluate your learning progress of the lesson.

When selecting the “Course Catalog” button a list of CET (Continuing Electrical Training) Courses appears. CET courses are available courses other than apprenticeship courses. These courses are utilized for Journeyman training, CW/CE training, NECA & IBEW training, and also available to apprentices. CET courses are not part of the Inside Apprenticeship curriculum. To take one of these courses the user (including apprentices) must contact the JATC office.

The “Reports” button allows the students to review their grades and login events. There are two sets of reports: (1) *Student Overview Reports*; and (2) *Time/Login Reports*. These types of reports can be accessed by clicking on the “+” box in the right side of the blue bars. Under these expanded types of reports are several detailed reports for you to maintain knowledge of your progress.

The report lists your submitted first attempt of the quiz listed under the “Lesson Activity” at the bottom of your lesson pages. It is likely that part of your overall grade will include a percentage of these reports, therefore perform your best on the first attempt of the quizzes. These reports also allow your instructor and administrative staff to review your progress and to tailor the lesson plans for your training.

**HOUSEKEEPING** – You will find the online LMS easy to navigate. There are subtle features such as changing your password...or gaining a temporary password if you forget it. At the bottom right of most pages is a **LMS Support** button that allows you to access an online KB (Knowledge Base) to help with issues of operating the LMS...such as popup blockers, etc. This is not a method to submit comments and suggestions about content in the LMS...for it will not be reviewed in this manner. If you have comments and suggestions, please forward your thoughts to your instructor for they have the functionality to submit content errata and suggestions on their LMS instructor page. This procedure also reduces a comment from every student on the same item and provides the means of a collective comment/suggestion from the class.
